

Simplifying your journey to cloud and beyond.

Poprush helps organisations modernise, connect and manage their technology environments with practical cloud, infrastructure and managed service solutions.

Built for growing businesses, enterprises and public-sector organisations that need technology to work harder, with less complexity.

Where we add value

Advisory & consulting

Cloud strategy, roadmaps, vCIO and digital maturity.

Multi-cloud

Azure, AWS, GCP and hybrid cloud expertise.

Private hosting

Dedicated infrastructure, bare metal and hybrid integration.

Business connectivity

Fibre, LTE, 5G and SD-WAN for resilient operations.

Managed services

Monitoring, support, optimisation, backup and recovery.

AI compute

Scalable GPU infrastructure for AI, ML and high-performance workloads.

POPRUSH
cloud & consulting

See more. Spend smarter. Act faster.

A unified management layer for Microsoft365 and Azure that turns complex operational data into clear priorities, savings opportunities and risk actions.

Microsoft cloud clarity, in one executive view.

Unified visibility

One view across M365 and Azure.

Cost optimisation

Spot waste, rightsizing and savings.

Security + governance

Surface high-severity risks early.

Actionable insight

Prioritised actions for teams and leaders.

Flexible deployment

SaaS or private Azure-tenant options.

POPRUSH
cloud & consulting

IceWarp

One workspace. Every way your team works.

IceWarp brings business email, chat, meetings, calendars, files and office-compatible documents together in a unified collaboration environment.

A strong fit for organisations looking to simplify communications and collaboration while retaining deployment flexibility and migration options.

Let's talk about the right productivity stack for your business.

Business email

Professional email under your own domain.

Team Chat

Focused team and project collaboration.

Conferencing

Online meetings and video conferences.

Calendar

Shared scheduling, events and reminders.

Files + documents

Store, share and collaborate on files.

Office productivity

Create and edit documents, spreadsheets and presentations.

Cloud or on-premises | Microsoft 365 migration tooling | Desktop + mobile access
